 Satin Brass (lacquered)

6094-PBNL :
 Polished Brass (lacquered)

INSTALLATION:

Determine position of the Push Latch on the frame toward the edge of the door opposite the hinges.

Install the strike on the back of the door so the push latch will be fully engaged when the door is closed.

Attach the Push Latch to the frame by first securing the two screws into the long adjustment slots.

Adjust the Push Latch until the door is performing as desired, then secure the remaining two screws.
